Mrs. Hopkins Appointed "Time To Remember" Chairman For Heart Assoc.

Mrs. Delories Hopkins of Appomattox has been reappointed the American Heart Association's "A Time To Remember" Chairman for Appomattox County. The announcement was made by Mr. Richard C. Purvis of McLean, Chairman, Board of Directors of the Virginia Affiliate of the American Heart Association.

Mrs. Hopkins thanked the citizens of Appomattox for their past support of the "Time To Remember" program, indicating $181,054 was received in Virginia last year from such contributions. The "Time To Remember program encourages gifts for any occasion - get well, birthday, anniversary or death. A new component of the program will be the scrolls to be used when more than one person makes a gift. The scroll will list all contributors and is sent to the honored person or their family. The scrolls can be used on special occasions like birthdays, weddings and graduations as well as for the traditional memorializing of the deceased.

The American Heart Association uses the money received from the contributions to support the programs of research, education and community service. During 1978-79 over $21 million was awarded by the Heart Association to support research of the heart and blood vessels, making AHA the largest independent supporter of cardiovascular research in the world. As a result of the continuing work in heart research and public education, dramatic declines over the last decade have been detected in several areas of cardiovascular deaths. Total cardiovascular deaths are down 21.3% and hypertensive deaths, 47.92.

To make a "Time To Remember" gift, send your contribution with the name of the person to be honored, your name and address as well as that of the person to be notified. Checks should be made out to the American Heart Association and sent to Mrs. Hopkins, Rt. 2, Box 305, Appomattox, Va. 24522. The gift is tax deductible and will be acknowledged to the family, with the amount being held confidential. For more details, Mrs. Hopkins can be reached at 352-5474.

Good News For Homemakers

By Shirley W. Walton

Buy Wise and Avoid Appliance Problems

Homemakers, this is another article in a series on how you can fight inflation.

Continued consumer complaints about home appliances frequently result from poor judgement when the appliance is purchased.

The major appliance consumer action panel (MACAP), a consumer action organization involved with appliance complaints cites the following ten most often neglected guidelines that cause consumer dissatisfaction. They are: (1) Be sure there is enough room to move the appliances in and out of your home to clean and service them and provide ventilation around them. (2) Check gas or electricity to be sure they are adequate for the new appliance. Water supply and drain facilities should be checked for washers and dishwashers and food waste disposers. (3) Consider appliance size in relation to family size and future needs of your family. (4) Be sure you are satisfied with the brand, style, model and color of the appliance before it is installed. (5) Be sure you need and will use the features which add to the purchase price. Many people purchase appliances with many extras on them and never use them. (6) Be sure the appliance is rugged enough to meet your needs. That there is high quality in the appliance finish and trim, working components and decorative parts and that it's easy to maintain and it works as claimed by the seller. Ask if a demonstration is possible. (7) Ask about the warrenty before you buy and be sure you understand what it does and doesn't provide. (8) Consider the availability of competent, nearby service. (9) Look for seals verifying that certain safety requirements have been met. Underwriters Laboratory (UL)- labels on electrical appliances and American Gas Association Laboratories (AGA) seals on gas appliances assures that certain safety standards are being met on all units for that model and brand. (10) Compare the energy efficiencies of otherwise similar units and consider the size of various models in terms of what each will cost to operate. When energy labeling becomes available, make use of it.

Following these guidelines can reduce or eliminate many appliance problems. If you have an inflation fighting idea concerning the use of appliances or other items, please call us at 352-8244 or write us at P.O. Box 488, Appomattox, Va.

Also, homemakers, if you have a homemaking question or problem, you may contact us at the above address and phone number. It is always a pleasure to hear from you and to work with you. Have a good week.
